LIFT 2027

Leaning Into Fault Tolerance

DATES	VENUE
22–26 March 2027	Scuola Normale Superiore, Pisa

Organised by Planckian

Quantum computing has reached an inflection point. At LIFT 2027, Planckian brings together an international group of scientists, spanning academia and industry, to discuss the most pressing challenges and recent advances on the road to fault-tolerant quantum computing.

Industry Partner

€4,000
per sponsorship

SPEAK
A talk in the main programme

DEBATE
One seat on the discussion panel

PLUS

- One poster
- One table during the poster session
- Own banners and promotional materials welcome

Invited speakers

Seth Lloyd MIT	**Barbara Terhal** TU Delft	**Earl Campbell** Google Quantum AI	**Jens Eisert** Freie U. Berlin	**Martin Plenio** University of Ulm
Hsin-Yuan Huang Oratomic	**Joschka Roffe** University of Edinburgh	**David Amaro** Quantinuum	**Élie Gouzien** Alice & Bob	**Georgia Nixon** University of Sydney

More speakers to be announced.

ON THE PROGRAMME

QEC codes and decoders · Magic state distillation · Modular qubit architectures · Hamiltonian learning · Error mitigation · Fault-tolerant algorithms · Resource estimation · AI in quantum error correction
